A Parts Storeroom: The Impact to Manufacturing Performance

Through the use of data, best-in-class manufacturers are analyzing the impact a parts storeroom can have on the overall efficiency of leading manufacturing facilities.

“The parts department is the best place to start an improvement effort”, says Eric Martin, Director of Operations at Advanced Technologies Services. Martin talks to Food Processing magazine about ways to optimize manufacturing performance through technology and data.”

—Eric Martin, Director of Operations, Industrial Parts and Services
