# GE MULTILIN MANAGEMENT RELAYS

ATS currently repairs GE Multilin 469 Motor Management Relay. These devices are typically found in applications involving large motors driving pumps for the movement of high volume liquids in industries such as municipal water and waste treatment and pulp and paper. The 496 Motor Management Relay and the Multilin series equipment is used for the management of medium and large horsepower motors delivering motor protection, fault diagnostics, power metering and communications. Motor Management is a cost effective, preventative measure for applications where systematic failures can cause catastrophic damage to the motor and peripheral equipment.
