Advanced Technology Services, Inc.

## Uncover the Productivity and Profit Hidden in Your Parts Storeroom

In many factories, the parts crib is an afterthought. But at Advanced Technology Services, it's a place where savings, reliability and improved performance can be found—enough to impact your entire manufacturing operation.

ATS' Storeroom Management Solution is designed to drive efficiency, expand machine life, reduce downtime due to lack of parts, improve manpower utilization, and increase business insights through comprehensive metrics. Comprised of several material management disciplines our solution is a powerful way to drive MRO to a new level of value.

Our comprehensive program brings parts standardization, greater efficiencies and cost savings to your overall manufacturing operation. Organization and security are key elements—but the benefits don't stop there. Inventory location and storeroom staffing ensures that your operating personnel are serviced properly, with efficiency as the overall goal of storeroom activities. ATS' systems and processes eliminate wasted effort and maximize your MRO team's efforts to reduce equipment downtime and enhance plant productivity.

When the right part is in the right place, at the right time, factories run better—and that's the aim of ATS Storeroom Management.

### COMPREHENSIVE AND STRATEGIC

ATS Storeroom Management is comprised of a series of comprehensive, strategic material management disciplines designed to deliver quantifiable results:

- ➔ **5S Services:**  
Sort, Straighten, Shine, Standardize and Sustain — five steps that transform MRO crib performance
- ➔ **Standardized Part Naming Conventions:**  
Intelligent and intuitive identification conventions that assures correct ordering and utilization
- ➔ **Detailed Warranty Tracking:**  
Warranties for every purchased part, component and assembly, tracked and claimed where appropriate
