Manufacturer's Challenges

Unplanned Downtime

Technical Talent Shortages

IIoT Technology Implementation

ATS Labor & Technology Solutions

Supplemental Maintenance

ATS efficiently addressed one plant's technical needs, prompting further discussions surrounding implementing ATS solutions, including surge support, storeroom management, and machine health monitoring across several of their manufacturing facilities.

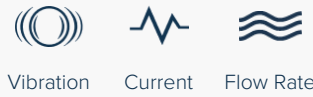

Machine Health Monitoring

Seeking a more predictive maintenance approach, ATS was chosen as the manufacturer's strategic partner to deploy, track, and analyze data across 100 plants through their **Reliability 360® Machine Health Monitoring program**, driven by decades of proven maintenance, reliability, equipment and technician expertise.

Results Within the First 6 Months

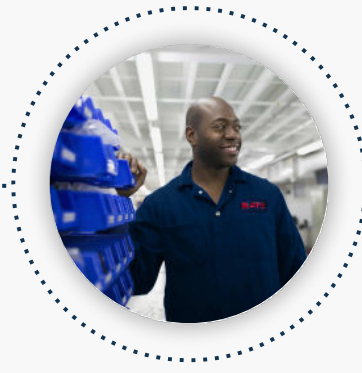

Partnership Growth

New expansion plans are being explored to grow their ATS partnership.

What's Next

Expansion of **R360™ machine health monitoring** across new service lines and facilities.

Discussions of **ATS storeroom management** throughout several key plant operations.
